SKILLS

Programming Languages / Technologies

JavaScript · TypeScript · React · ReduxToolkit · C# .Net · Python

Database

MySQL · PostgreSQL

CI

Jenkins · TeamCity

Methodologies

Scrum · Kanban

Testing Tools

TestRail · Jira · Zephyr

Development Tools

VS Code · VisualStudio · XCode · Unity3D · IntelliJ IDEA · PyCharm

Automation Tools

NUnit · TestStack.White · Selenium WebDriver · Maven · XCTest

Professional Experience

React Frontend Developer

11/23 – 05/26

Luxoft

- Developed and maintained web application features using React and JavaScript
- Built a booking system with a calendar interface for reserving test rigs and managing their availability
- Implemented new UI functionality and enhanced existing features based on business requirements
- Developed functionality for creating and managing automated test cases through the UI
- Integrated frontend components with backend APIs and worked with application data stored in the database
- Implemented forms, validation, state management, and user interactions
- Investigated and resolved frontend issues and improved existing React components
- Collaborated with backend developers and QA engineers throughout feature development and testing.

Automation/Manual QA Engineer

05/22 – 10/23

Luxoft

- Performed manual testing of the frontend and backend of a John Deere web tool
- Automated backend tests in Python using Behave (BDD)
- Designed and maintained test cases and test documentation based on requirements
- Performed functional, regression and smoke testing before releases
- Reported and tracked defects in Jira, verified fixes with the development team

Automation QA Engineer Python

05/20 – 03/22

Luxoft

- Developed and maintained automated tests for Python microservices
- Tested REST APIs and integration between services
- Created and ran performance and load tests with Locust, analysed results and reported bottlenecks
- Integrated automated tests into the CI pipeline
- Collaborated with developers on defect investigation and test coverage

Automation QA Engineer C#

05/19 – 05/20

Luxoft

- Automation testing of Web insurance application
- Requirements analysis and test cases creation

Performance Testing Tool

Locust

Version Control System

Git

Language

English: Upper-Intermediate

Automation QA Engineer
08/17 – 05/19

SoftServe

- Automation testing of Windows/Mac desktop application Sourcetree
- Requirements analysis and test cases creation
- Manual testing of Sourcetree

QA Engineer
01/17 – 07/17

Mauris

- Manual testing of mobile apps and websites
- Bug reporting via Jira
- Requirements creation and communication with client

QA Engineer
09/16 – 12/16

Varg Technologies

- Manual testing of mobile app
- API monitoring and testing via Runscope
- Creating automated test cases using Behat (API testing)
- Working with admin panel
- Creating user stories for MVP

QA Engineer
05/16 – 09/16

Room8Studio

- Manual testing of mobile game
- Testing via Unity3D
- Creating test cases

Junior QA Engineer
10/15 – 04/16

Luxoft

- Manual testing of mobile application
- Working with project test documentation
- Development of Test Scenarios
- Take part in Story team meetings (requirements analysis)

Education & Training

04/26 – 09/26	Frontend Pro - Hillel IT school
05/22 – 07/22	Python Basic - Hillel IT school
03/17 – 06/17	Automation QC (Python) - IT Academy SoftServe
09/16 – 10/16	QA Automation course "Prog.Kiev.ua"
03/16 – 07/16	Java Programming course "Brain Academy"
05/16	SQL for Testers course, Luxoft
01/15 – 02/15	Software Testing course, ITLabs, Kyiv, Ukraine
09/08 – 06/13	Specialist degree, "Enterprise economy", National Technical University of Ukraine "Kyiv Polytechnic Institute"
